

Router chassis shell SECC-T1N metal metal stamping parts

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1000
- Price: \$ +1~10+Pcs
- Delivery Time: 15-20
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 3000+pcs+Month

Product Specification

- Size: Customized Size
- Color: Customized Color
- Service: OEM/ODM, OEM/ODM/One-Stop Service
- Tolerance: 0.01-0.05mm, Negotiable
- Precision: $\pm 0.05-0.1\text{mm}$, $\pm 0.1\text{mm}$
- Product Name: Sheet Metal Tool Box
- Highlight: **Box Sheet Metal Cutting And Bending, Bending Waterproof Sheet Metal Enclosure, ODM Box Sheet Metal Cutting**

Product Description

Item	Description
Product Name	Router chassis shell SECC-T1N metal metal stamping parts
Working Process	Blanking, stamping, Punching, deep drawing, bending, Coining, Curling,Forming, threading,welding, tapping, riveting, cnc machining, CNC Milling
Material	carbon steel, Stainless steel Aluminum, copper, brass, bronze (according to customer's requirements)
Surface Treatment	Galvanized, Zinc, nickel, chrome-plated, Powder Coating, Polishing, Spraying, Anodizing, Pickling, E-coating, etc.
Packing	Inner-Plastic Bag; Outer -Standard Carton Box + Pallet/Wood Case
Application	Automobiles, Construction, Transportation, Furniture, machinery, home appliance, electronic & electric appliance, Agricultural Equipments
Equipments	stamping/punching machine, CNC bending machine, CNC Laser cutting machine, 5-250T punching machines, Welding Manapulator
Thickness	0.5mm~12mm
File Format	Solidworks,Pro/Engineer,Auto CAD,PDF,JPG
Service	Warm and quick response service provided by the professional Export Sales Team with many years' experience in handling exports to the US, Europe, Japan and other countries and regions.
Inspection	100% QC as to each products

Customized Precision Machine Box Sheet Metal Bending and Cutting Services

Optimize your projects with our customized precision machine box sheet metal bending and cutting services. Our advanced technology and skilled craftsmanship ensure high-quality, accurate, and reliable sheet metal components tailored to your specifications.

Advanced Sheet Metal Bending and Cutting Services:

Utilize our state-of-the-art bending and cutting technologies to produce intricate and precise sheet metal components. Our expertise in metal fabrication guarantees precision, consistency, and adherence to strict quality standards for all your machine box needs.

Key Features:

Precision Bending: Achieve exact angles and complex shapes with our precision bending services. Our advanced equipment ensures consistency and accuracy for every bend, no matter how intricate.

Cutting-Edge Cutting: Benefit from our high-precision cutting technology, capable of creating clean and precise cuts in various sheet metal materials. Ideal for detailed and accurate component fabrication.

High-Quality Materials: Work with premium materials such as stainless steel, aluminum, and other alloys, chosen for their excellent mechanical properties and durability.

Customization: Our custom fabrication services ensure that your specific design requirements are met. We offer a wide range of customization options, including different shapes, sizes, and surface treatments.

Applications:

Machine Enclosures: Perfect for creating durable and precisely engineered machine boxes and enclosures that protect internal components and withstand industrial environments.

Electrical Cabinets: Ideal for fabricating electrical enclosures and cabinets that require precise dimensions and reliable construction for safety and performance.

Industrial Equipment Housings: Suitable for housing and protecting industrial machinery components, ensuring longevity and operational efficiency.

Automotive Components: Reliable for producing custom automotive parts that demand precision and durability in a variety of applications.

Telecommunications: Essential for fabricating enclosures and chassis for telecommunications equipment, ensuring protection and optimal performance.

Customization Options:

Design Flexibility: Provide tailored solutions to meet your unique design requirements, including custom shapes, sizes, and configurations.

Surface Treatments: Enhance the performance and appearance of your parts with various surface treatments such as powder coating, anodizing, and plating.

Prototype to Production: Support your project from initial prototype development to full-scale production, ensuring each component is optimized for performance and quality.

Why Choose Us?

Experience and Expertise: With extensive experience in sheet metal bending and cutting, we are a trusted partner for high-quality fabrication services.

Quality Assurance: Implement rigorous quality control measures at every stage of production to ensure our products meet industry standards and your specific requirements.

Customer Satisfaction: Committed to delivering exceptional customer service, timely delivery, and competitive pricing to support your projects effectively.

Upgrade your machine boxes and enclosures with our customized precision sheet metal bending and cutting services. Contact us today to discuss your requirements and discover how our advanced solutions can enhance the efficiency and reliability of your applications.
