

Custom Metal Bending Welding Punching Service Aluminum Stainless Steel Stamping Part Sheet Metal Fabrication

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 1000
- Price: \$ +1~10+Pcs
- Delivery Time: 15-20
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 3000+pcs+Month

Product Specification

- Type: Stamping Parts
- Material: Iron/Steel
- Surface Treatment: Galvanized
- Shape: Customized
- Tolerance: $\pm 0.01\text{mm}$
- Size: Customized
- Color: Customized
- Thickness: 0.5mm-10mm
- Application: Industrial

Product Description

Item	Description
Product Name	Custom Metal Bending Welding Punching Service Aluminum Stainless Steel Stamping Part Sheet Metal Fabrication
Working Process	Blanking, stamping, Punching, deep drawing, bending, Coining, Curling,Forming, threading,welding, tapping, riveting, cnc machining, CNC Milling
Material	carbon steel, Stainless steel Aluminum, copper, brass, bronze (according to customer's requirements)
Surface Treatment	Galvanized, Zinc, nickel, chrome-plated, Powder Coating, Polishing, Spraying, Anodizing, Pickling, E-coating, etc.
Packing	Inner-Plastic Bag; Outer -Standard Carton Box + Pallet/Wood Case
Application	Automobiles, Construction, Transportation, Furniture, machinery, home appliance, electronic & electric appliance, Agricultural Equipments
Equipments	stamping/punching machine, CNC bending machine, CNC Laser cutting machine, 5-250T punching machines, Welding Manapulator
Thickness	0.5mm~12mm
File Format	Solidworks,Pro/Engineer,Auto CAD,PDF,JPG
Service	Warm and quick response service provided by the professional Export Sales Team with many years' experience in handling exports to the US, Europe, Japan and other countries and regions.
Inspection	100% QC as to each products

Elevate your projects with our custom metal fabrication service, offering precision metal bending, welding, and punching for aluminum and stainless steel stamping parts. From intricate designs to structural components, our expert fabrication team delivers high-quality sheet metal components tailored to your specifications.

Key Features:

Metal Bending: Utilizing advanced bending machinery, we offer precise metal bending services for aluminum and stainless steel, enabling the creation of components with accurate angles and dimensions.

Welding: Our skilled welders ensure strong and durable welds for assembly and fabrication projects, providing structural integrity and reliability for your components.

Punching: With state-of-the-art punching equipment, we offer precise hole punching and shaping capabilities, allowing for the creation of customized patterns and designs on sheet metal.

Sheet Metal Fabrication: Our comprehensive fabrication capabilities encompass a wide range of processes, including cutting, forming, bending, welding, and finishing, providing a complete solution for your sheet metal needs.

Advantages of Our Service:

Precision Engineering: Our fabrication processes are executed with precision and accuracy, ensuring that each component meets your exact specifications and quality standards.

Versatile Applications: From industrial machinery to architectural elements, our metal fabrication service caters to diverse industries and applications, offering versatility and flexibility in design and functionality.

Quality Materials: We use high-quality aluminum and stainless steel materials known for their strength, durability, and corrosion resistance, ensuring long-lasting performance for your fabricated parts.

Customization Options: We offer a wide range of customization options, including material selection, design modifications, surface finishes, and production quantities, to meet your specific project requirements.

Applications:

Architectural: Ideal for architectural elements such as brackets, frames, and panels, where precise metal bending and welding are required to achieve desired aesthetics and functionality.

Industrial Machinery: Used in manufacturing machinery components, enclosures, and structural elements, providing strength, durability, and reliability in demanding industrial environments.

Automotive: Suitable for automotive applications such as chassis components, brackets, and mounts, offering lightweight and corrosion-resistant solutions for vehicle manufacturing.

Why Choose Us?

Experience and Expertise: With years of experience in metal fabrication, our team has the knowledge and expertise to deliver high-quality components that meet your exact specifications.

State-of-the-Art Equipment: Our modern fabrication facility is equipped with advanced machinery and technology, allowing us to execute complex projects with precision and efficiency.

Customer Satisfaction: We prioritize customer satisfaction and strive to exceed your expectations with every order, offering responsive communication and personalized service throughout the fabrication process.

Upgrade your projects with our custom metal bending, welding, and punching service for aluminum and stainless steel stamping parts. Contact us today to discuss your requirements and discover how we can bring your vision to life with precision and reliability.
