

Oxidation Finish Custom Metal Stamping Parts Precision and Durability for Your Business

Our Product Introduction

for more products please visit us on metalstamp-parts.com

Basic Information

- Minimum Order Quantity: 1000
- Price: \$ +5~20+Pcs
- Delivery Time: 15-30
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,MoneyGram
- Supply Ability: 3000+pcs+Month

Product Specification

- Tolerance Control: $\pm 0.01\text{mm}$
- Mold: Customized Progressive Die
- Surface Treatment: Plating
- Odm: Available
- Press Force: 25Ton
- Material Specifications: Stainless Steel (304, 316), Carbon Steel (Q235, 45#), Spring Steel (SK5, 65Mn), Aluminum Alloys (6061, 5052)
- Handle Type: All Kinds
- Size: Customized
- Highlight: **Precision Metal Stamping Parts,
Custom Metal Stamping Parts,
Durability Metal Stamping Parts**

Product Description:

Welcome to our product summary for Copper Stamping Parts, specifically focusing on the Metal Stamping Parts that we offer. These precision-engineered components are designed to meet the highest standards of quality and performance.

Our Metal Stamping Parts are manufactured with a Spm of around 300 PCS, ensuring efficient production processes and timely delivery of orders. The high Spm rate enables us to meet the demands of various industries, including automotive, electronics, and more.

With a finish of Oxidation, our Metal Stamping Parts not only exhibit a sleek and professional appearance but also offer enhanced durability and resistance to corrosion. This finish adds a layer of protection to the components, ensuring long-lasting performance even in challenging environments.

When it comes to Manufacturing Capabilities, our Metal Stamping Parts are crafted using a range of advanced techniques, including Precision CNC turning, milling, grinding, Complex stamping, and sheet metal forming. These capabilities allow us to create intricate and precise components that meet the exact specifications of our customers.

The Material Thickness of our Metal Stamping Parts is set at 0.1mm, ensuring that the components are lightweight yet robust enough to withstand the rigors of daily use. This optimal thickness strikes a balance between strength and flexibility, making our parts suitable for a wide range of applications.

One of the standout features of our Metal Stamping Parts is the Handle Type, which includes All Kinds of handles to cater to diverse user preferences and requirements. Whether you need a specific type of handle for ergonomic comfort or functional efficiency, our range of options ensures that you can find the perfect fit for your needs.

Our Metal Stamping Parts are ideal for a variety of applications, including Deep Drawn Metal Stamping for creating complex shapes and Automotive Metal Stamping for the automotive industry. These components are engineered to deliver exceptional performance and reliability in demanding environments.

In conclusion, our Metal Stamping Parts offer a winning combination of precision, durability, and versatility. Whether you need components for automotive applications, electronics, or any other industry, our Copper Stamping Parts are designed to exceed your expectations. Place your order today and experience the quality and craftsmanship that sets our Metal Stamping Parts apart from the rest.

Features:

Product Name: Metal Stamping Parts -----

Manufacturing Capabilities: Precision CNC turning, milling, grinding, Complex stamping and sheet metal forming

Treatment: Stamping And Puching

Size: Customized

Material Specifications: Stainless Steel (304, 316), Carbon Steel (Q235, 45#), Spring Steel (SK5, 65Mn), Aluminum Alloys (6061, 5052)

Applications: Used in ATM cash dispensers for note feeding, separation, and delivery systems, Compatible with major brands such as NCR, Diebold, Wincor, GRG, Hyosung, Suitable for ATM OEM manufacturing, maintenance, refurbishment, and spare parts supply

Technical Parameters:

Treatment	Stamping And Punching -----
Handle Type	All Kinds
Surface Treatments	Zinc plating, black oxide, anodizing, deburring
Tooling Life	5000 Shots
Manufacturing Capabilities	Precision CNC turning, milling, grinding, Complex stamping and sheet metal forming
Material Specifications	Stainless Steel (304, 316), Carbon Steel (Q235, 45#), Spring Steel (SK5, 65Mn), Aluminum Alloys (6061, 5052)
Spm	Around 300 PCS
Size	Customized
Quality Assurance	In-process inspections, Final QC with dimensional verification tools, Material certifications, ISO 9001-based quality management process
Material Thickness	0.1mm

Applications:

Product Application Occasions and Scenarios for Custom Metal Stamping Parts: -----

Custom metal stamping parts are versatile components used in a variety of industries and scenarios due to their precision manufacturing and durability. Here are some key application occasions where custom metal stamping parts play a crucial role:

1. Automobile Metal Stamping Parts:

Custom metal stamping parts find extensive use in the automotive industry for manufacturing automobile metal stamping parts. These parts are essential for various components such as chassis, body panels, brackets, and engine parts. The high-quality materials like stainless steel, carbon steel, and aluminum alloys ensure the durability and performance of these parts even in demanding automotive

applications.

2. Automotive Stamping Parts:

Another significant application scenario is the production of automotive stamping parts, including components like brackets, flanges, and connectors. These parts require precise stamping and punching processes to meet the industry standards for quality and performance. The surface treatments like zinc plating, black oxide, and anodizing provide corrosion resistance and enhance the appearance of automotive stamping parts.

With a minimum order quantity of 1000 pieces, custom metal stamping parts offer flexibility in meeting the specific requirements of automotive manufacturers. The price range of \$5 to \$20 per piece makes them a cost-effective solution for large-scale production. Payment terms including L/C, D/A, D/P, T/T, Western Union, and MoneyGram ensure convenient transactions for global customers. Furthermore, the supply ability of 3000+ pieces per month and a delivery time of 15-30 days enable efficient production planning and timely order fulfillment. The material specifications ranging from stainless steel (304, 316) to aluminum alloys (6061, 5052) cater to diverse needs across the automotive industry.

Overall, custom metal stamping parts offer reliable performance, customization options, and quality surface treatments, making them ideal for various application occasions in the automotive and other industries.

Support and Services:

Our company provides comprehensive product technical support and services for our Metal Stamping Parts. Our team of experts is dedicated to assisting customers with any technical inquiries related to the product. We offer guidance on installation, maintenance, troubleshooting, and optimization of Metal Stamping Parts to ensure optimal performance and longevity.

Packing and Shipping:

Product Packaging and Shipping Information:

Our metal stamping parts are carefully packaged to ensure they reach you in perfect condition. Each part is wrapped in protective material to prevent scratching or damage during transit. The parts are then placed in sturdy cardboard boxes with ample cushioning to absorb any impact.

Shipping Method: We ship our products via trusted carriers to ensure timely and secure delivery. You will receive a tracking number once your order has been dispatched so you can monitor its progress every step of the way.

FAQ:

Q: What is the minimum order quantity for Metal Stamping Parts?

A: The minimum order quantity for Metal Stamping Parts is 1000 pieces.

Q: What is the price range for Metal Stamping Parts?

A: The price range for Metal Stamping Parts is \$5 to \$20 per piece.

Q: What are the accepted payment terms for purchasing Metal Stamping Parts?

A: The accepted payment terms for Metal Stamping Parts include L/C, D/A, D/P, T/T, Western Union, and MoneyGram.

Q: What is the supply ability for Metal Stamping Parts?

A: The supply ability for Metal Stamping Parts is 3000+ pieces per month.

Q: What is the typical delivery time for Metal Stamping Parts?

A: The typical delivery time for Metal Stamping Parts is between 15 to 30 days.
