

Customizable Metal Stamping Parts with Sand Blasting Surface Finish and 25Ton Press Force Assurance Guaranteed

Our Product Introduction

for more products please visit us on metalstamp-parts.com

Basic Information

- Minimum Order Quantity: 1000
- Price: \$ +5~20+Pcs
- Delivery Time: 15-30
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,MoneyGram
- Supply Ability: 3000+pcs+Month

Product Specification

- Manufacturing Capabilities: Precision CNC Turning, Milling, Grinding, Complex Stamping And Sheet Metal Forming
- Spm: Around 300 PCS
- Press Force: 25Ton
- Tooing Life: 5000 Shots
- Finish: Oxidation
- Tolerance Control: ± 0.01 mm
- Quality Assurance: In-process Inspections, Final QC With Dimensional Verification Tools, Material Certifications, ISO 9001-based Quality Management Process
- Treatment: Stamping And Puching
- Highlight: Customizable Metal Stamping Parts, Sand Blasting Metal Stamping Parts,

Product Description

Product Description:

Automotive Metal Stamping has revolutionized the manufacturing industry by offering efficient and precise solutions for producing custom metal parts. One of the key products in this field is the Metal Stamping Parts, which are essential components in various applications across industries. These parts are known for their durability, precision, and versatility, making them a preferred choice for manufacturers looking for high-quality components. The Metal Stamping Parts undergo a specialized treatment process known as Stamping and Punching, which involves shaping the metal using a die and press machine. This treatment method ensures uniformity and consistency in the parts, resulting in superior quality and performance. The Type of Die used in manufacturing these parts is the Progressive Die, which allows for the production of intricate and complex designs with high precision. With advanced Manufacturing Capabilities that include Precision CNC turning, milling, grinding, Complex stamping, and sheet metal forming, these Metal Stamping Parts are able to meet the most demanding requirements of various industries. The use of cutting-edge technology and equipment ensures that each part is manufactured to the highest standards of quality and accuracy. One of the key advantages of the Metal Stamping Parts is their exceptional Tolerance Control, with a tolerance level of $\pm 0.01\text{mm}$. This level of precision guarantees that each part fits perfectly and functions flawlessly within its intended application, providing reliability and longevity. The Press Force required for producing these Metal Stamping Parts is 25Ton, which is sufficient for handling a wide range of metal materials and thicknesses. This ensures that the parts are formed with the right amount of force, resulting in high-quality components that meet the strictest industry standards. In conclusion, the Metal Stamping Parts offer a reliable and efficient solution for manufacturers in need of Custom Stamping Parts. With their Automotive Metal Stamping capabilities, advanced manufacturing processes, and superior quality control measures, these parts are the ideal choice for a wide range of applications across industries. Whether you need precision components for automotive, aerospace, electronics, or any other sector, Metal Stamping Parts are the perfect choice for meeting your specific requirements.

Features:

Product Name: Metal Stamping Parts

Tooling Life: 5000 Shots

Surface Treatments: Zinc plating, black oxide, anodizing, deburring

Material Thickness: 0.1mm

Manufacturing Capabilities: Precision CNC turning, milling, grinding, Complex stamping and sheet metal forming

Spm: Around 300 PCS

Technical Parameters:

Mold	Customized Progressive Die
Material Thickness	0.1mm
Quality Assurance	In-process inspections, Final QC with dimensional verification tools, Material certifications, ISO 9001-based quality management process
Tooing Life	5000 Shots
Type Of Die	Progressive Die
Spm	Around 300 PCS
Surface Treatments	Zinc plating, black oxide, anodizing, deburring
Material Specifications	Stainless Steel (304, 316), Carbon Steel (Q235, 45#), Spring Steel (SK5, 65Mn), Aluminum Alloys (6061, 5052)
Treatment	Stamping And Puching
Manufacturing Capabilities	Precision CNC turning, milling, grinding, Complex stamping and sheet metal forming

Applications:

Brass Stamping Parts, Deep Drawn Metal Stamping Parts, and Automotive Stamping Parts are versatile products that find a wide range of application occasions and scenarios due to their unique attributes. With a Minimum Order Quantity of 1000 pieces and a price range of \$5 to \$20 per piece, these metal stamping parts are ideal for various industries and purposes.

These metal stamping parts are commonly used in the automotive industry for manufacturing components such as brackets, clips, and connectors. The high precision and durability of these parts make them suitable for use in vehicles where reliability is crucial. Additionally, their ability to withstand high temperatures and harsh conditions make them ideal for automotive applications.

Another key application scenario for Brass Stamping Parts, Deep Drawn Metal Stamping Parts, and Automotive Stamping Parts is in the electronics industry. These parts are used in the production of electronic enclosures, connectors, and other components that require precise shaping and intricate designs. The customized progressive die molds ensure that the parts meet the specific requirements of electronic devices.

Moreover, these metal stamping parts are also suitable for use in the furniture industry for manufacturing hardware, fasteners, and decorative elements. The availability of ODM services allows for the creation of bespoke designs to match the aesthetics of different

furniture pieces. The wide range of handle types and treatments, including stamping and punching, further enhance the versatility of these parts.

With a supply ability of 3000+ pieces per month and flexible payment terms such as L/C, D/A, D/P, T/T, Western Union, and MoneyGram, these metal stamping parts are easily accessible to businesses of all sizes. The quick delivery time of 15-30 days ensures that orders are fulfilled promptly, meeting the needs of various industries and projects.

In conclusion, Brass Stamping Parts, Deep Drawn Metal Stamping Parts, and Automotive Stamping Parts are essential components used across different sectors, thanks to their high quality, customization options, and reliability in diverse application scenarios.

Support and Services:

Our product technical support team is available to assist with any questions or issues related to our Metal Stamping Parts. We offer expert guidance on installation, maintenance, troubleshooting, and optimization of our products to ensure they meet your specific requirements.

In addition to technical support, we provide a range of services to enhance the performance and longevity of our Metal Stamping Parts. This includes regular maintenance programs, on-site inspections, training sessions, and customized solutions to meet your unique needs. Our goal is to provide comprehensive support and services to help you maximize the benefits of our Metal Stamping Parts and ensure their reliable operation in your applications.

Packing and Shipping:

Product Packaging:

Our metal stamping parts are carefully packaged to ensure they arrive safely to our customers. Each part is wrapped in protective material to prevent scratches and damage during transit. The parts are then placed in sturdy cardboard boxes with ample cushioning to absorb any impact.

Shipping:

We offer reliable and efficient shipping options for our metal stamping parts. Orders are processed promptly and shipped using reputable carriers to ensure timely delivery. Customers can track their shipments and can expect their orders to arrive in excellent condition.

FAQ:

Q: What is the minimum order quantity for Metal Stamping Parts?

A: The minimum order quantity for Metal Stamping Parts is 1000 pieces.

Q: What is the price range for Metal Stamping Parts?

A: The price for Metal Stamping Parts ranges from \$5 to \$20 per piece.

Q: What are the accepted payment terms for purchasing Metal Stamping Parts?

A: We accept payment via L/C, D/A, D/P, T/T, Western Union, and MoneyGram for Metal Stamping Parts.

Q: What is the supply ability of Metal Stamping Parts?

A: Our supply ability for Metal Stamping Parts is 3000+ pieces per month.

Q: What is the typical delivery time for Metal Stamping Parts?

A: The delivery time for Metal Stamping Parts is typically 15-30 days.
