

25Ton Press Force Auto Metal Stamping Parts for Precise Sheet Metal Forming

Our Product Introduction

for more products please visit us on metalstamp-parts.com

Basic Information

- Minimum Order Quantity: 1000
- Price: \$ +5~20+Pcs
- Delivery Time: 15-30
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,MoneyGram
- Supply Ability: 3000+pcs+Month

Product Specification

- Surface Treatments: Zinc Plating, Black Oxide, Anodizing, Deburring
- Odm: Available
- Spm: Around 300 PCS
- Mold: Customized Progressive Die
- Material Specifications: Stainless Steel (304, 316), Carbon Steel (Q235, 45#), Spring Steel (SK5, 65Mn), Aluminum Alloys (6061, 5052)
- Size: Customized
- Treatment: Stamping And Puching
- Applications: Used In ATM Cash Dispensers For Note Feeding, Separation, And Delivery Systems, Compatible With Major Brands Such As NCR, Diebold, Wincor, GRG, Hyosung, Suitable For ATM OEM Manufacturing.

Product Description

Product Description:

Are you in need of high-quality metal stamping parts for your business? Look no further! Our custom stamping parts are designed to meet your specific requirements and deliver exceptional performance. With a wide range of applications and materials to choose from, our metal stamping parts are the perfect solution for various industries.

Our metal stamping parts are suitable for a variety of applications, including ATM cash dispensers for note feeding, separation, and delivery systems. They are compatible with major brands such as NCR, Diebold, Wincor, GRG, and Hyosung, making them a versatile choice for ATM OEM manufacturing, maintenance, refurbishment, and spare parts supply.

When it comes to surface treatment, our metal stamping parts are plated to ensure durability and corrosion resistance. This plating enhances the appearance of the parts while providing added protection against wear and tear, making them suitable for long-term use in demanding environments.

We offer metal stamping parts in a variety of materials to meet the diverse needs of our customers. Our material specifications include stainless steel (304, 316), carbon steel (Q235, 45#), spring steel (SK5, 65Mn), and aluminum alloys (6061, 5052). Each material is carefully selected for its specific properties, ensuring that our metal stamping parts meet the highest standards of quality and performance.

At our facility, tolerance control is a top priority. We guarantee precision and accuracy in every metal stamping part we produce, with a tolerance control of $\pm 0.01\text{mm}$. This level of precision ensures that our parts fit perfectly and perform flawlessly in your applications, whether it's deep draw metal stamping, automobile metal stamping parts, or any other custom stamping requirement.

With our ODM services, we offer customization options to tailor our metal stamping parts to your exact specifications. Whether you need a specific size, shape, or design, we can work with you to create the perfect solution for your needs. Our team of experienced engineers and technicians are dedicated to delivering top-quality metal stamping parts that meet and exceed your expectations.

Invest in our metal stamping parts today and experience the difference in quality and performance. Contact us now to learn more about our custom stamping parts and how they can benefit your business. Trust in our expertise and commitment to excellence for all your metal stamping needs!

Features:

Product Name: Metal-Stamping Parts

Spm: Around 300 PCS

Type Of Die: Progressive Die

Quality Assurance:

In-process inspections

Final QC with dimensional verification tools

Material certifications

ISO 9001-based quality management process

Material Thickness: 0.1mm

Treatment: Stamping And Puching

Technical Parameters:

Tooling Life	5000 Shots
Size	Customized
Spm	Around 300 PCS
Treatment	Stamping and Punching
Manufacturing Capabilities	Precision CNC turning, milling, grinding, Complex stamping and sheet metal forming
Surface Treatment	Plating
Press Force	25Ton
Surface Treatments	Zinc plating, black oxide, anodizing, deburring
Material Thickness	0.1mm
Mold	Customized Progressive Die

Applications:

Product Application Occasions and Scenarios for Hardware Stamping Parts:

Hardware stamping parts are versatile components that find applications in various industries and scenarios due to their customizable nature and durability. Below are some key product attributes that make hardware stamping parts suitable for a wide range of uses:

Minimum Order Quantity: 1000 pieces

Price: \$5-\$20 per piece

Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram

Supply Ability: 3000+ pieces per month

Delivery Time: 15-30 days

Size: Customized as per requirements

Quality Assurance: In-process inspections, Final QC with dimensional verification tools, Material certifications, ISO 9001-based quality management process

Surface Treatments: Zinc plating, black oxide, anodizing, deburring

Spm: Around 300 pieces

Tooling Life: 5000 Shots

Product Application Scenarios:

Automotive Industry: Hardware stamping parts play a crucial role in the automotive industry, where precision components are required for various applications such as chassis, bodywork, and engine parts. These parts are used in manufacturing vehicles, ensuring structural integrity and functionality.

Hardware Manufacturing: Hardware stamping parts are essential in the hardware manufacturing sector for producing items like brackets, fasteners, and connectors. The customizable size and surface treatments make them ideal for diverse hardware applications.

Construction Sector: In the construction industry, hardware stamping parts are used in structural frameworks, support systems, and fixtures. The durability and quality assurance of these parts make them reliable for demanding construction scenarios.

Electronics and Appliances: Hardware stamping parts are also utilized in the electronics and appliance industry for producing components like enclosures, brackets, and connectors. The surface treatments enhance the aesthetics and functionality of these parts.

Overall, hardware stamping parts cater to a broad spectrum of industries and scenarios, offering customizable solutions with quality assurance and durability. Their application versatility makes them indispensable in various manufacturing and production processes.

Support and Services:

Our company offers comprehensive Product Technical Support and Services for our Metal Stamping Parts product. Our team of experts is dedicated to assisting you with any technical inquiries, troubleshooting issues, and providing guidance on product usage.

We strive to provide top-notch customer service by offering maintenance services, repair assistance, and product upgrades to ensure the optimal performance of our Metal Stamping Parts. Our technical support team is available to address any concerns and offer solutions to enhance your overall experience with our product.

Packing and Shipping:

Product Packaging:

Each metal stamping part is carefully wrapped in protective packaging to prevent any damage during transportation. The parts are then placed in sturdy cardboard boxes with cushioning materials to ensure they arrive safely at their destination.

Shipping:

We offer various shipping options to cater to our customers' needs. Depending on your location and preferred delivery time, you can choose from standard shipping, express shipping, or expedited shipping. Our team works diligently to process orders quickly and efficiently to ensure prompt delivery of your metal stamping parts.

FAQ:

Q: What is the minimum order quantity for Metal Stamping Parts?

A: The minimum order quantity for Metal Stamping Parts is 1000 pieces.

Q: What is the price range for Metal Stamping Parts?

A: The price for Metal Stamping Parts ranges from \$5 to \$20 per piece.

Q: What are the accepted payment terms for purchasing Metal Stamping Parts?

A: We accept payment through L/C, D/A, D/P, T/T, Western Union, and MoneyGram for Metal Stamping Parts.

Q: What is the supply ability for Metal Stamping Parts?

A: Our supply ability for Metal Stamping Parts is 3000+ pieces per month.

Q: What is the typical delivery time for Metal Stamping Parts?

A: The typical delivery time for Metal Stamping Parts is 15-30 days.
